

CHTN PROCESSING FEES

Effective January 1, 2007

The Cooperative Human Tissue Network (CHTN) is funded by the National Cancer Institute to provide remnant human tissue specimens to IRB-approved researchers at academic and commercial institutions. A minimal processing fee is charged to investigators for the time and effort involved in collecting, processing, storing, and shipping these research specimens. These fees are provided below.

Initial Processing Fees

Academic Institutions

\$30.00 Initial processing fee per segment (regardless of processing method used)

Commercial Institutions

\$70.00 Initial processing fee per segment (regardless of processing method used)

Additional Services Available

Additional services can be provided to Academic and Commercial institutions for the following fees:

\$15.00	Additional processing of tissue from original segment (fresh, snap frozen, or OCT frozen)
\$15.00	Paraffin block
\$7.00	H&E slide
\$5.00	Unstained slide
\$7.00	Stained slide from frozen section
\$6.00	First cut, unstained slide from frozen section
\$4.00	Each additional cut from frozen section
\$8.50	50 micron section
\$8.00	5-cut ribbon (of routine thickness)
\$4.50	Touch preps
\$100.00	RNA Quality Check (per sample)
\$40.00	Frozen tissue macrodissection

Chart Reviews

Investigators may request chart reviews for a \$25 fee or more depending on labor and effort involved to complete the chart review.

Shipping Charges

Shipping charges are determined by Federal Express, and they vary according to the weight of the shipment.
